Mohammad Alauddin

Sr. DevOps Engineer@verbex.ai | Cloud Computing and DevSecOps Professional | CKA | CKS | GitOps | Azure & Azure Stack Hub | AWS | GCP | Infra Specialist | Sys Admin | Software Engineering | Consultant & Trainer

Dhaka, Bangladesh

Summary

Senior DevOps & Cloud Engineer with 14+ years of experience in designing, automating, and managing scalable cloud and hybrid infrastructure solutions. Strong expertise in DevOps practices, Kubernetes, CI/CD automation, infrastructure reliability, observability, and production operations, with a proven track record of building secure, highly available, and scalable systems across major cloud platforms and GPU-based cloud environments, focusing on containerized microservices, deployment automation, messaging systems, and operational excellence.Core Expertise:• Cloud Platforms: AWS, GCP, Azure, Azure Stack Hub, Nebius GPU Cloud• DevOps & CI/CD: Azure DevOps, Jenkins, GitLab CI/CD, GitHub Actions, Bitbucket Pipelines, ArgoCD• Infrastructure as Code & Automation: Terraform, Ansible, Shell Scripting• Containerization & Orchestration: Kubernetes, Docker, Docker Swarm• Microservices & Traffic Management: Istio Service Mesh, API Gateway, NGINX Ingress Controller• Messaging & Streaming Platforms: Kafka, RabbitMQ, NATS, Azure Service Bus, Google Cloud Pub/Sub• Logging & Monitoring: ELK Stack, Prometheus, Grafana, Datadog• Infrastructure Management: Cloud & Hybrid Infrastructure Design, Deployment, Scaling, and Operations• Linux & Windows Server Administration• Databases & Data Platforms: PostgreSQL, MySQL, MSSQL, MongoDB, Redis• Networking & Security: Site-to-Site VPN, DNS Management, SSL/TLS Implementation• Compliance & Security Standards: PCI-DSS, SOC 2• Automation & Release Management: Automated Build, Deployment, and Testing Pipelines• Collaboration & Project Management Tools: Atlassian Jira, Confluence, ClickUp , Linear, Notion,Slack• Collaboration & Productivity Platforms: Microsoft 365, Googel Workspace, Active Directory, Microsoft Exchange• Technical Leadership, Team Collaboration & Production Support

Experience

Verbex.ai

Senior DevOps Engineer

June 2023 - Present (3 years 3 months)

Gulshan

Cloud Expertise: Proficiently managed AWS, Azure, GCP services like EC2, IAM, S3, RDS, EFS, EBS, VPC, Security groups, SQS, SNS, Route 53, and Azure Stack Hub, establishing robust self-managed cloud infrastructures.

DevOps Proficiency: Executed Agile development methodologies, utilizing pivotal DevOps tools including Git, Bitbucket, DockerHub, Jira, Jenkins, Spinnaker, Slack,ArgoCD, streamlining project workflows.

Kubernetes Mastery: Managed Kubernetes clusters proficiently using Kops & Kubeadm, ensuring optimal performance and scalability.

Database Administration: Adeptly maintained MySQL & PostgreSQL databases on RDS and independently set up and managed self-managed PostgreSQL databases clusters.

Cluster Management: Established and maintained self-managed Kafka, Minio, Redis, RabbitMQ and NFS clusters, ensuring high availability and fault tolerance.

Logging & Monitoring: Proficiently handled log collection, storage, and management using Elastic Stack (ELK) while ensuring system health with Instana for robust monitoring and alerting.

Documentation & Methodologies: Proficient in maintaining comprehensive documentation using Jira & Confluence, adeptly working in Scrum and Kanban methodologies.

Automation & Efficiency: Scripted and automated core processes, enhancing efficiency and optimizing workflows.

Infrastructure Configuration & Management: Configured and managed Asterisk servers, performed backups, recovery, and data migration for services.

Rosebay Group

5 years 3 months

Independent DevOps Consultant

May 2023 - Present (3 years 4 months)

Reading

Lead DevOps Engineer

July 2022 - April 2023 (10 months)

Reading, United Kingdom (Remote)

Rosebay is a research focused IT incubation company. Rosebay has offices in Japan, Malaysia, Indonesia and UK and its development center is situated in Nepal. At present, I am responsible for overseeing all aspects of DevOps within Rosebay Group

Sr. DevOps Engineer

June 2021 - June 2022 (1 year 1 month)

Reading, England, United Kingdom

1. Design and implement container-based (Microservice) approaches to ensure enterprise-grade deliverables with sufficient reliability and availability.
2. Deploy and Manage Infrastructure (mainly Azure and AWS) for Production, UAT, DEV, and DEMO environments.
3. Assisting development teams to adjust working practices in alignment with modern-day software development and delivery approaches (CI/CD,).
4. Interact with customers and provide proper guidelines for operational IT security.
5. Create, manage and implement policies (both technical and people-focused) to ensure a proper DevOps culture in the organization as well as project-specific policies as required by customers.
6. Create and Manage Automated Pipelines in Azure DevOps for applications that build, deploy and Test across multiple environments.
7. Responsible for the timely delivery and reliability of operational processes within multiple environments.
8. SSL certificates implementation for different applications like Nginx, IIS, Nodejs
9. Deploy Site to Site VPN to establish a secure connection between On-Premise and AWS/AZURE Cloud infrasructure.
10. Deploy container orchestration using docker swarm
11. Deploy and manage different databases like MSSQL, PostgreSQL, MongoDB, Azure SQL, AWS RDS
12. Deploy microservices using API gateway (Mainly Kong 2.0)
13. Report (Operational and Security) preparation based on the requirement.

Mir Telecom Limited

2 years 3 months

Senior System Engineer | IT and Cloud Operations

January 2020 - June 2021 (1 year 6 months)

1. System Administration and managing all aspects of IT services for sister concerns of Mir Telecom Group. (IGW, IOS, ICX, Datacenter, Mir Cloud, and Mir Ceramic).
2. Infrastructure provisioning on Mir Cloud as per client requirements.
3. Installation, configuration, security patch/version up-gradation & troubleshooting of MS Windows and Linux Servers.
4. Deployment and manage different servers like FTP, SAMBA, VPN, Active Directory, Antivirus (Bitdefender endpoint security, Mail (cPanel, Microsoft 0365), and Cloud Storage.
5. Installation, configuration, and software deployment of the Access control system, Bio-metrics attendance system, and NVR server
6. Providing technical support (physical and remote) to end users.
7. Actively working with the purchasing team and external vendors to meet the requirements of Mir Groups IT products.
8. Perform scheduled or emergency maintenance work. System health check and providing support during maintenance and planned work

System Engineer | IT and Cloud Operations

April 2019 - January 2020 (10 months)

MTG Corporate House,House#4,Road#21,Gulshan-1,Dhaka

Bangla Telecom Limited (ICX of Mir Telecom)

6 years 5 months

Network Operations Engineer

January 2016 - March 2019 (3 years 3 months)

House#4,Road#21,Gulshan-1,Dhaka

• 24/7 Monitoring: Monitoring and Troubleshooting Core Network, Transmission, Datacom Equipment’s of NGN Network.
• Perform Operation & maintenance of Huawei equipment’s(SoftX-3000,UMG-8900,OSN-3500, OSN-1500B U-2000)
• Alarm monitoring and Fault localization, troubleshooting and analysis to identify root cause.
• Continuous review of the network ensuring fault free environment and ensuring network documentation (design, drawings, etc.) are up to date.

• Continuous & effective coordination with other teams (Back Office, Mobile operators, IGWs,ICXs,IOS's, International carriers and Service providers) to streamline the operations
• Changing Route destinations according to performance and requirements.
• Develop and produce periodic operations reports and provide recommendations for enhancement and up-gradations.
• Monitoring network security and analysis using different NMS.
• Communicating with vendors and clients for technical issues.
• Perform schedule or emergency maintenance work. System health check and providing support during maintenance and planned work execution.

Asst. Network Operations Engineer
November 2012 - December 2015 (3 years 2 months)
Red Crescent Borak Tower (Level-7),71-72 Old Elephant Road, Eskaton Garden,Dhaka

• 24/7 Monitoring: Monitoring and Troubleshooting Core Network, Transmission, Datacom Equipment's of NGN Network.
