MOHAMMAD ALAUDDIN

Senior Infrastructure Engineer | Platform & DevOps | Kubernetes, AWS, Terraform, GitOps

Dhaka, Bangladesh (UTC+6) | +880 1734 292667

alauddin25524@gmail.com | linkedin.com/in/mohammad-alauddin-3325b256 | alauddin-devops.github.io

PROFESSIONAL SUMMARY

Infrastructure and platform engineer with 14+ years running production systems for fintech, telecom and banking across AWS, Azure, GCP and on-premises datacenters. CKA and CKS certified, with hands-on ownership of managed and self-managed Kubernetes, Terraform-defined cloud estates, and GitOps delivery via GitHub Actions and ArgoCD. Carries production on-call, runs incidents and postmortems, and treats developers as customers - building self-service tooling and documentation that keeps infrastructure off the critical path. 18 production systems shipped across 8 countries, including four years fully remote and async with a UK-based engineering group.

TECHNICAL SKILLS

Cloud & Infrastructure as Code: AWS (EC2, EKS, S3, RDS, IAM, VPC, ALB, Site-to-Site VPN, CloudFront), Azure, Azure Stack Hub, GCP, Nebius GPU Cloud, Terraform, Ansible.

Containers & Orchestration: Kubernetes (EKS, GKE, Kops, Kubeadm), Docker, Docker Swarm, Istio, NGINX Ingress, Kong API Gateway, horizontal/vertical autoscaling, resource requests & limits

CI/CD & GitOps: GitHub, GitHub Actions, ArgoCD, GitLab CI/CD, Azure DevOps Pipelines, Jenkins, multi-environment promotion, rollback strategies, Bash automation

Observability & Reliability: Datadog, Prometheus, Grafana, ELK/EFK Stack, Zabbix, Nagios, JMeter, on-call rotation, incident response, postmortems, SLO/alert tuning

Data & Messaging: MongoDB (self-managed and Atlas), PostgreSQL, MySQL, MSSQL, Azure SQL, Redis, Elasticsearch, Kafka, RabbitMQ, NATS, MinIO, Azure Service Bus, GCP Pub/Sub - replication, failover, HA

AI-Assisted Engineering: Claude, Codex, Gemini, GPT for code review, IaC and pipeline drafting, incident investigation, log analysis, documentation

Platforms & Security: Linux (RHEL, CentOS, Ubuntu), Windows Server, Java, Node.js, Python and PHP deployment/operations, Cloudflare (DNS, WAF, DDoS protection), GCP Cloud Armor, SSL/TLS lifecycle, OpenVPN, vulnerability and patch management, disaster-recovery design, ISO/IEC 27001, PCI-DSS and SOC 2 aligned controls

PROFESSIONAL EXPERIENCE

Verbex.ai (Hishab Technologies Ltd.) — Dhaka, Bangladesh (Remote) Jun 2023 - Present

Senior DevOps Engineer

- Own production infrastructure end to end across AWS, Azure, GCP and Azure Stack Hub, covering production, staging and development environments for conversational-AI.
- Run production Kubernetes across managed GKE clusters and self-managed clusters provisioned with Kops and Kubeadm — cluster upgrades, node lifecycle, autoscaling, and resource requests/limits tuning under real production traffic.
- Define and manage the cloud estate as code in Terraform — reusable modules promoted across production, staging and development — and automate server configuration, patching and repetitive operational tasks with Ansible.
- Build and maintain GitOps delivery with GitHub, GitHub Actions and ArgoCD — every service gets a repeatable build/test/deploy path from git and a rollback route the engineering team trusts in production.
- Run managed & self-managed Kafka, Redis, RabbitMQ, NATs, MinIO and NFS clusters alongside PostgreSQL, MySQL and MongoDB Atlas, with replication, failover and tested restore procedures.
- Own the observability stack — Datadog for APM, metrics and dashboards, Prometheus and Grafana for cluster and service-level metrics and alerting, and ELK for centralised logging — tuning signal-to-noise so on-call pages map to real customer impact.
- Manage edge security and DNS with Cloudflare (DNS, WAF) and GCP Cloud Armor - WAF rule sets, rate limiting and DDoS mitigation in front of production services.
- Led two full-estate migrations (AWS to on-premises, on-premises to GCP) with cutover planning, rollback criteria and no unplanned downtime; provisioned a GPU cluster on Nebius GPU Cloud for training and inference.
- Apply AI tooling (Claude, Codex, Gemini, GPT) daily to speed up delivery and cut operational toil — drafting and reviewing IaC and pipeline code, accelerating incident investigation and log analysis, and generating runbooks and technical documentation.
- Author operational, runbook and security documentation for internal and external stakeholders; design backup, failover and disaster-recovery protocols for business continuity.

Rosebay Group — Reading, United Kingdom (Fully Remote) Jun 2021 - Present

Independent DevOps Consultant *May 2023 - Dec 2024*

Lead DevOps Engineer, DevOps Team *Jul 2022 - Apr 2023*

Senior DevOps Engineer *Jun 2021 - Jun 2022*

- Delivered cloud infrastructure and CI/CD for a multinational fintech group, shipping production platforms in the USA (Orbispay), Dominica (MLajan), Cambodia (AEON eMoney), Canada (Whitehaven), South Sudan (DigiCash) and the UK (Finify).
- **Cut cloud spend by over $2,000 per month (~$24k annually)** on the Orbispay platform through instance rightsizing, resource cleanup and environment scheduling - without degrading performance.
- Built automated pipelines in Azure DevOps and GitHub Actions covering DEV, UAT, DEMO and PROD, standardising build, test and deployment across every product in the group.
- Treated developers as internal customers: delivered self-service tooling and environment access that let product teams build, deploy and verify without waiting on the infrastructure team.
- Deployed Cloudflare DDoS protection and edge configuration for Orbispay; established AWS Site-to-Site VPN tunnels for regulated third-party API integrations.
- Ran database platform work across Azure SQL, AWS RDS, MSSQL, PostgreSQL and MongoDB, including replication, automated failover and high-availability topologies for payment workloads.
- Worked async and remote-first across five country offices, authoring the technical and security policy documentation the distributed team ran on; now advise the group on DevOps strategy and platform architecture as an independent consultant.

Mir Telecom Group — Gulshan-1, Dhaka, Bangladesh — Apr 2019 - Jun 2021

Senior System Engineer, IT Infrastructure & Cloud Operations — *Jan 2020 - Jun 2021*

System Engineer, IT Infrastructure & Cloud Operations — *Apr 2019 - Jan 2020*

- Ran IT and cloud operations for six group companies (IGW, IOS, ICX, datacenter, Mir Cloud and Mir Ceramic), covering provisioning, patching, hardening and 24/7 availability of Windows and Linux estates.
- Provisioned Mir Cloud infrastructure to client specification and deployed a site-to-site VPN into the Singapore Equinix datacenter.
- Deployed and administered Active Directory, DNS, Microsoft 365, mail, file services and Bitdefender GravityZone endpoint security; ran scheduled and emergency maintenance windows and delivered internal IT security-awareness training.

Bangla Telecom Limited — Dhaka, Bangladesh — Nov 2012 - Mar 2019

Network Operations Engineer, Operations & Maintenance — *Jan 2016 - Mar 2019*

Assistant Network Operations Engineer — *Nov 2012 - Dec 2015*

- Carried 24/7 monitoring and on-call responsibility for the core NGN network of a national Interconnection Exchange operator, working Huawei SoftX-3000, UMG-8900 and OSN-3500/1500B platforms via U-2000.
- Performed alarm triage, fault localisation and root-cause analysis on live traffic-affecting incidents, feeding findings back into runbooks and network documentation.
- Led the network operations team, introduced recurring operational reporting and process improvements that reduced repeat escalations, and coordinated with carriers and operators during incidents and planned works.

Earlier (2012): Assistant System Engineer — Switch Com Ltd. • Assistant Network Engineer — T.N. International

CERTIFICATIONS

Kubernetes: Certified Kubernetes Administrator (CKA) • Certified Kubernetes Security Specialist (CKS)

Cloud & DevOps: Microsoft Certified: DevOps Engineer Expert (AZ-400) • Azure Administrator Associate (AZ-104) • Azure Fundamentals (AZ-900)

Systems, Security & Networking: RHCE • RHCSA • MCSA: Windows Server 2016 • ISO/IEC 27001 Information Security Associate • EFK Stack: Enterprise-Grade Logging and Monitoring • JNCIA-Junos • MTCNA

TEACHING & COMMUNITY

- Deliver corporate Kubernetes and CI/CD workshops for bank engineering teams - GitLab CI/CD on Kubernetes (Al-Arafah Islami Bank), CKA-focused training (Pubali Bank), container modernisation (Community Bank).
- Mentor international student research groups in Finland on scalable 5G network components on Kubernetes and prediction-driven Kubernetes scaling automation.

EDUCATION

B.Sc. in Electrical & Electronic Engineering - American International University-Bangladesh, 2012
Major: Cellular Mobile Communication & Microwave Engineering • CGPA 3.60 / 4.00
